## Profile

I consider myself a strong learner, a team player, and somebody who is driven by their work. This past year, I have become increasingly involved with software and hardware development, as reflected in my coursework and my personal endeavors. I'm very interested in a summer internship involving code development, circuit design, or network design. There may be more qualified people out there, but I really love what I do. I'm ready to rise to the challenges of industry on projects which have an impact, do it to the best of my abilities, and do it with a positive attitude.

---

## SKILLS

- C++
- Python
- Verilog HDL
- Microsoft Visio, Excel
- Circuit Analysis/Implementation
- Electromagnetics
- SOLIDWORKS

## STRENGTHS

- Collaboration
  - Fast paced learning
  - Work ethic
  - Attitude
- 

## EDUCATION

### Colorado School of Mines – Golden, CO

- 3.9 GPA
- CSM Presidential Scholarship Recipient

**B.S. Spring 2019**

**Major: Electrical Engineering**

**Minor: Computer Science**

### Niwot High School – Niwot, CO

- IB Diploma Recipient
- 

## WORK EXPERIENCE

- Telecom patent research  
Work involved studying basic 4G LTE systems, finding existing patents relevant to potential claims, discussing originality and improvements to intellectual property
- Irrigation, electrical wiring, landscaping, carpentry  
Experience working with people of different ages and backgrounds, working long hours on demanding projects using power equipment, implementing low voltage systems
- Security staff  
Front end experience working with customers

**SetterRoche LLP  
Summer 2016**

**Local  
May 2013 - July 2016**

**Argus Event Staffing  
Fall 2015**

---

## HOBBIES

- Collegiate Rugby
  - Basketball, Tennis, Skiing, Concerts
-
